

Facial Treatment

This course covers the technique for performing a superficial and deep cleanse, tone, steam, extract, massage, mask and moisturisation. It also includes fantastic anatomy and physiology resources with clear diagrams and images. Health and safety guidance is covered as well as skin conditions, skin analysis and advice about different skin types as well as guidance as to which type of product is suitable for use.

Entry Requirements:

You must have completed the GTi Professional Standards course supplied within the course.
